# Chuck

**Growth:** Chuck has gained 50g since his arrival.

Arrival weight was 370g and he is now 420g.

**Diet:** Chuck gets 6-9mls goat milk 5 times a day plus wild leaves offered twice a day. He is a VERY good leaf eater!

**Health:** So far he seems very healthy.

**Behavioral:** Chuck has only been here about a month, but he is very gentle and curious. He plays well by himself and with others.

**Recent Milestones:** He recently has started climbing to the top of the jungle but will sometimes cry for help when he gets to the top.

**Future Goals:** Continue weight gain and climbing practice as well as see what other leaves he may already like.
